Universal Ceiling Fan MCF1000

INSTALLATION INSTRUCTIONS

- Mount on a flat, open area.
- Check and tighten all bolts before use.
- Be sure to not drill into any part of the roll cage.
- Use only when the machine is running to avoid draining the battery.

INCLUDED IN THIS KIT

Please verify that all hardware and parts are included in your package.

Part#	Qty	Item Description
1	4	MCF1000_Post
2	4	5/16 x 3.5" Button Head Bolt
3	4	5/16" Nylock Nut
4	8	5/16" Flat Washer
5	4	5/16" Rubber Washer
6	10	10" Cable Ties

HEATER FAN INSTALLATION

1. Connect the wiring harness to the fan control board. Do not connect to the battery yet.
2. Locate a suitable area on the bottom side of your machine's roof for the ceiling fan.
3. Mark the mounting locations on the inside of your machine's roof by holding up the fan and marking the holes or by measuring the hole spacing and creating matching marks on the roof.
4. Drill holes in the roof using a 5/16" drill bit.
5. Install the ceiling fan onto the bottom side of the roof using the included hardware and spacers. Make sure to use flat washers and rubber washers on the top side of the roof to reduce the chance of leaks.
6. Connect the wiring harness to the battery or terminal block (brown to positive, blue to negative).
7. Secure the wiring to the roll cage to take out slack in the wire. Use the supplied cable ties to do so.
